

Auburn Bearing & MANUFACTURING

Made in the USA since 1898

It's true... we have been in the bearing business for a long time now. Auburn Ball Bearing was established in 1898. Recently, we came upon this piece of memorabilia from our early years and want to share it with you. It is from an exhibit at the 1904 World's Fair in St. Louis, Missouri.

Price List of Style T-114

Standard thrust with inside sleeve. The bore is 1-32 to 1-16 inch larger than sizes named at A. One Race in each pair is ground to standard sizes given at B for outside housing. Pat'd

No.	A	B	C	List Price

24	5 ⁹ / ₁₆	10 ¹ / ₁₆	3 ¹ / ₄	89.00

Jackson Herndon.

Auburn Ball Bearings

This is a simple reminder that you have visited the WORLD'S FAIR, at ST. LOUIS, MO.,

1904

and learned the name of the

**Auburn
Ball Bearing Co.**
of 18 COMMERCIAL ST.
ROCHESTER, N. Y.

Keep this in your pocket; File it when you get home; It will surely become useful to you some day.

If you have not seen our exhibit and carefully noted the system of the

AUBURN BALL BEARING.

write for full particulars when you get home. If in anyway interested in the mechanical line, you should certainly know all about the

AUBURN BALL BEARING.

Simply consult any mechanical engineer in the country and he will advise you as to the real merits of the

AUBURN BALL BEARING.

We are pleased to abide by the verses of the mechanical profession as to the merits of the

AUBURN BALL BEARING.

We do not claim to be the only judges but prefer calling upon you, as mechanical engineer or manufacturer of any kind of machinery whatsoever, to name it and it will sound louder than our saying so. Their use covers the entire field of machinery.

We shall be pleased to fully instruct you as to their installation in every particular and guarantee satisfaction. The actual cost is saved every year no matter what it is or where they are used. The savings therefore comes 1st, in power; 2nd, in belting; 3rd, in wear on machinery; 4th, in oil; 5th, reducing the care of machinery in too many ways to mention.

They are the Only Actual Four Point Rolling Contact Ball Bearings in the World

In which every ball in each bearing is called upon to do its proportional share of the work at any LOAD or SPEED without limit.

Simply tell us your want and we will prescribe for you to your entire satisfaction guaranteed.

The AUBURN BALL SHAFTING BEARING makes both top and bottom balls carry their equal share of the load which no other style of bearing in the world can, and we are pleased to state that it stands alone without a near approach of equality in this and in all other points. This is worth your careful consideration.

Thanking you, we are,

Very respectfully yours,

AUBURN BALL BEARING CO.

18 Commercial St.,

ROCHESTER, N. Y.

Over the years we have seen many changes, but still manufacture quality Thrust Bearings and Components. In June of 2013 we changed our name to Auburn Bearing & Manufacturing. As we enter our 117th year in business, we look forward to many more years of providing you with our high quality bearings.
